SYSTEM TEMPLATE LABEL	Grazed Forest CMU 2c with forestry technology	
SYSTEM NAME	Grazed Forest	
PLANNING PHASE	Alternative 1	
PLANNING LEVEL	RMS	
NRCS LANDUSE	Grazed Forest	
PLANNED CONSERVATION PRACTICES		<i>List conservation practices in the system</i>
1.	Forest Stand Improvement, mechanical - 666	
2.	Prescribed Grazing - 528A	
3.	Spring Development – 574	
4.	Watering Facility – 614	
5.	Pipeline - 516	
6.	Tree/Shrub Pruning - 660	
7.	Upland Wildlife Habitat Mgt. 645	
SYSTEM NARRATIVE <i>Describe how the practices work together as a system</i>		
<p>CMU 2c will be a silvopasture system. This includes using forest stand improvement and tree/shrub pruning to reduce the shading of the herbaceous, forage species. The livestock will be managed to optimize the utilization of forage produced. A livestock watering facility will be provided. These practices together will also optimize the timber production potential of the conifers, which will increase long-term income.</p>		
RESOURCE CONCERNS	SYSTEM EFFECTS	IMPACTS
Plant Condition; Productivity	productivity is increased due to reduction of shading	Forage and timber yield goals are met to an acceptable production level. Quality Criteria is met.
Plant Management; Establishment, Growth, & Harvest	Management is improved using a silvopasture system.	Improved plant management provides increased forage production. Quality Criteria is met.

Plant Suitability; intended use	Plants are more suited to the intended use	Plants are suitable and contribute to an increased productivity level. Quality Criteria is met.
Human Economic; Profitability	increase in income from livestock, long-term income increase from timber	Long term profitability is maintained. Quality Criteria is met.
